

Isoplus UK is a satellite company of the Isoplus Group, part of the Viessmann family. With locations in Sandtoft, England, and Livingston, Scotland, Isoplus UK supplies high-quality pre-insulated pipes for distributing hot and chilled water in district energy networks across the UK and Ireland.

Isoplus UK: *Leading the Way in Quality and Innovation*

Isoplus UK delivers top-tier pre-insulated pipe systems built to meet the toughest demands of modern networks. With steel and PEX options, their solutions combine advanced materials, thermal efficiency, and long-lasting durability.

Maximum Thermal Efficiency:

Rigid polyurethane foam insulation in a tough polyethylene casing minimises heat loss, boosting energy efficiency.

Built to Last:

Designed to withstand harsh conditions, reducing maintenance and lowering operational costs.

Easy Installation:

PEX is versatile, customisable, and available from UK stock for quick installation.

Key Facts

- Over a decade of experience in delivering high-quality pre-insulated pipe systems to small and large scale networks.
- Led by Managing Director Chris Hill, supported by a skilled team of engineers and project managers.
- Comprehensive services include design, pipe sizing, jointing, and technical support—both on-site and back office.
- Trusted by heat network operators, contractors, and consulting engineers.
- CPD accredited with an in-house training programme—CAMPUS—for designers, operators, and installers.
